EXPERIENCE

WEPAY (JPMORGAN CHASE)

Staff Software Engineer | Feb 2022 – Current

Senior Software Engineer | July 2021 – Feb 2022

Software Engineer | May 2020 – July 2021

- Designed and developed several Java microservices, including applications for storing configuration data, bulk automatic onboarding for First Republic Bank, SDK generation, and web gateway services.
- Served as the engineering lead for the WePay Web Infrastructure team, and in 2023, took on additional responsibilities as the manager and scrum master.
- Helped to sunset the WePay systems and transition the team to new roles in client onboarding.
- Mentored and provided technical guidance to team members.

BROADCOM (AQUIRED SYMANTEC IN 2019)

R&D Software Engineer 2 | Nov 2019 – May 2020

Software Engineer | July 2018 – Nov 2019

Software Engineer Intern | June 2017 – Sep 2017

- Contributed to the development of SONAR, a C++ Windows driver providing behavioral antivirus protection.
- Designed and developed a script tracking feature to provide real-time protection against popular malware attack vectors.
- Assisted in porting the Windows kernel-mode antivirus engine to cross-platform C++, enabling it to run on MacOS.

UCLA STUDENT MEDIA

Development Lead & System Administrator | May 2015 – June 2018

- Developed full-stack web and mobile applications utilizing frameworks such as Django, Angular, Ionic, and React Native.
- Managed cloud-based servers on Digital Ocean, hosting more than 10 student-run news websites.

PROJECTS

UCLA MAPS

- Led the development of a Django backend that enables both outdoor and indoor navigation across UCLA.
- Created an indoor navigation library to generate and draw routes using GIS data.
- Integrated the React Native frontend with the REST API.

APPGET

- Developed a Platform as a Service application that enables users to create and deploy mobile apps in minutes without coding.
- Provides fully functional components which are customizable via a web interface.
- Deployed over 15 mobile apps for UCLA and other universities using this platform.

BLINK1-WEB

- Built a website to remotely control an LED in real time.
- Implemented peer-to-peer communication across NAT using Node.js relay server.

SKILLS

PROGRAMMING

Experienced:

Java • Python • JavaScript

Familiar:

C++ • HTML/CSS • Shell

LIBRARIES/Frameworks

Spring Boot/Integration •
Dropwizard • Angular • React •
Node.js • OpenAPI • JUnit

TOOLS/PLATFORMS

Docker • Git • Linux • SQL •
Cloud Foundry

EDUCATION

COMPUTER SCIENCE, B.S.

UCLA | 2014 - 2018

summa cum laude, 3.91 GPA
